

IT Asset Requisition Policy

1. Overview

This policy governs the assignment, use, and return of corporate IT assets across all departments.

2. Standard Allocation

Associate Analysts and Analysts will be assigned a standard Windows laptop. Managers and Directors are eligible for premium laptops or macOS devices based on departmental approval.

3. Return of Assets

All IT assets must be returned to the Internal IT department on or before the last working day during the separation process. Failure to do so will result in a deduction from the Full & Final (FnF) settlement.
